

● VIETNAM SUBSIDIARY ROLLOUT

Roll Out NetSuite To Your **Vietnam** Subsidiary.

S4 Consulting helps multinational companies and NetSuite partners extend Oracle NetSuite into Vietnam with ready-built localization bundles for statutory reporting, e-invoicing, AP automation, and bank integration.

● **READY-BUILT VIETNAM LOCALIZATION BUNDLES**

Everything A Vietnam Subsidiary Needs, Already Built.

Instead of scoping Vietnam compliance from scratch, S4 deploys four pre-built NetSuite bundles that reduce rollout time and help the subsidiary go live compliant.

BUNDLE 01

Vietnam Financial Localization

A VAS-compliant chart of accounts and statutory reporting layer built on top of the global NetSuite instance, aligned with Circular 99/2025/TT-BTC.

- VAS-mapped chart of accounts under Circular 99/2025/TT-BTC
- Balance Sheet, P&L, and Cash Flow templates
- Localized VAT and PIT fields
- VND functional currency with dual reporting

[Learn More →](#)

BUNDLE 02

Vietnam E-Invoice Integration

Direct integration between NetSuite and licensed Vietnamese e-invoice providers, supporting Circular 91/2026/TT-BTC requirements.

- Auto-generates e-invoices from NetSuite sales transactions
- Status sync for issued, signed, and submitted invoices
- Works with major licensed providers (VNPT, Viettel, BKAV, Mất Bảo)
- Supports Circular 91/2026/TT-BTC e-invoice rules

[Learn More →](#)

BUNDLE 03

AP Automation

Pulls payable invoices directly from the Tax Authority by tax code and brings them into NetSuite matched against vendor and purchase order records - no OCR, no manual entry.

- Payable invoices pulled by tax code, straight from the Tax Authority
- Invoices matched against vendor and purchase order records
- No OCR involved - data comes structured from the source
- Less manual data entry for local accounting

BUNDLE 04

Bank Integration

Connects NetSuite directly to Vietnamese bank accounts - any bank can be integrated, with ACB and Vietcombank ready-built today.

- Automated bank statement retrieval via SFTP
- Payment orders that respect each bank's own approval matrix
- Reconciliation on NetSuite's native matching engine
- Any Vietnamese bank can be added, scoped to its file format or API

● FAST, COST-SAVING METHODOLOGY

Thorough Preparation. Dedicated Delivery.

S4 rolls out Oracle NetSuite to Vietnam subsidiaries by reducing compliance risk, shortening localization timelines, and controlling go-live cost for multinational teams and NetSuite partners.

Vietnam-Specific Discovery

Map VAT, PIT, statutory reporting, and e-invoicing requirements against the existing NetSuite instance.

Global-to-Local Data Standardization

Standardize chart of accounts, vendors, and master data while preserving group reporting.

Go-Live Simulation

Rehearse real Vietnamese invoicing, tax, and payment scenarios before cutover.

VAS/IFRS Advisory

ACCA-certified accountants reconcile VAS statutory books with IFRS or US GAAP reporting.

AI-Assisted Development

AI speeds up localization scripting, testing, and documentation while improving accuracy.

Transparent T&M Model

A clear Time & Materials model keeps scope practical and cost visible from day one.

ENGLISH-SPEAKING LOCAL DELIVERY TEAM

● HOW THE ROLLOUT WORKS

From Discovery To A Fully Compliant Go-Live.

S4 applies the methodology to a Vietnam-specific rollout scope, usually as a defined phase alongside or after the group's core NetSuite implementation.

1

Discovery & Compliance Gap Analysis

Review the group's NetSuite instance against Vietnam statutory, tax, and e-invoicing requirements, then define the bundles the subsidiary needs.

2

Subsidiary & Chart of Accounts Configuration

Configure the Vietnam entity in NetSuite OneWorld with VAS mapping, VND functional currency, and local tax fields.

3

Bundle Deployment & Integration

Deploy financial localization, e-invoice integration, AP automation, and bank integration into transaction flows.

4

Data Migration & Standardization

Migrate opening balances, master data, and historical records to match both local and group data models.

5

Go-Live Simulation

Simulate live operations with Vietnamese invoicing, VAT, and payment scenarios so edge cases are caught before cutover.

6

Go-Live & Local Support

S4 stays on as the local support partner for statutory filings, e-invoice operations, and system administration.

"The S4 team showed exceptional professionalism and dedication throughout the project. Even in a complex manufacturing environment, they explained every detail clearly and supported each end user with care. We felt a true partnership, not just a service vendor."

Mr. Tommy • CEO, ActLife Vietnam

● CASE STUDY · MANUFACTURING

LifeWear Technologies Vietnam Goes Live On NetSuite.

NetSuite in production - real-time visibility, VAS localization, and manufacturing control for a US-serving healthcare and mobility manufacturer.

Factory photo source: LifeWear Technologies website

Thanh Hóa, Vietnam

Go-Live: October 2025

Healthcare & Mobility Manufacturing

S4 Consulting delivered the Oracle NetSuite ERP go-live for LifeWear Technologies Vietnam, giving the manufacturer a unified operational platform, real-time data visibility, and stronger supply chain and production control.

Modules Implemented

Finance & Accounting

Purchasing & Supplier Management

Inventory & Warehouse

Manufacturing & Production Control

Order Management & Fulfillment

Implementation Highlights

- Unified financial model across Vietnam and US entities
- VAS localization for chart of accounts, tax, and reporting
- Manufacturing setup: BOM, routing, work orders, and material control
- Supply chain and fulfillment optimization
- End-user training, cutover, and go-live support
