Circular 45/2013

Asset management and depreciation

By site

Issues and transfers

Tools

Cost allocation

• S4 Consulting · Acumatica Gold Partner

• Built by S4 for Acumatica

• Vietnamese - English interface

From acquisition to disposal, **without leaving the ERP.**

Accounting, equipment teams and project managers track assets by site, location and custodian.

STEP 01

Asset records and depreciation

Set up assets by class, useful life, funding source, condition and accounting data, then track depreciation with the right configuration.

STEP 02

Issues and transfers between sites

Manage asset requests and transfers between branches, departments, custodians or sites, with handover and receipt steps.

STEP 03

Physical counts by location

Count assets by location of use to find differences between the books and what is actually at each branch or site.

STEP 04

Tools and cost allocation

Track tools and supplies, allocate their cost through the right accounts and manage where they are used, so tool cost appears in operating cost.

STEP 05

Site equipment and project cost

Asset processes connect with project and site equipment data: machine hours are recorded by project, task and cost code to allocate equipment cost accurately.

Key capabilities

VN Fixed Asset Management for Acumatica

- Asset data by class, useful life and funding source
- Depreciation, transfers and disposals
- Issues and transfers between sites
- Handover, receipt and counts by location
- Tools and cost allocation
- Linked to project and site equipment data

Value by role

Accounting keeps asset records and data consistent with the ERP. Project managers and equipment teams control assets by site, location and custodian. Executives analyze asset cost, depreciation and tools as part of the operating cost picture.

Who it is for

Manufacturing, construction and equipment rental companies, and organizations with many branches or locations holding assets.

• WHY VN FIXED ASSET MANAGEMENT

What sets **VN Fixed Asset Management** apart

See assets by site, location and custodian, not only by ledger account.

Aligned with asset regulations

Asset and depreciation data are organized in line with Vietnamese accounting standards.

✓ Depreciation, transfer, disposal

Linked to sites and locations

Built for construction companies and multi-location organizations: know where each asset is, who holds it and which site carries the cost.

✓ Full asset lifecycle control

Asset cost in the operating picture

Management analyzes asset cost, depreciation and tools alongside operating cost instead of merging spreadsheets.

✓ Analysis by site

S4 Vietnam Localization Suite for Acumatica

Choose one package or combine them to fit your operating model

VN Financial Localization

Vietnamese books and financial statements under Circular 99/2025/TT-BTC.

VN Payroll

Payroll, social insurance, PIT and labour cost by project.

VN Fixed Asset Management

Fixed assets and tools tracked by location, department and site.

VN Site Safety

Checklists, CAPA and permit to work for Acumatica Construction Edition.
